

James Marshall

Springfield, TN

The internet used to be a luxury in our schools. Now it is how Teachers Teach and Students Learn. The E-Rate program has allowed Robertson County Schools TN to provide internet resources to our students - period. Without E-Rate funding, we simply could not have afforded it. I know review is needed. I think there are many areas that are funded that could be limited - other than bandwidth and voice reimbursement. Internet bandwidth should be the first priority. Please continue helping us help our students!
